Advisories by test

Advisories are guidance from the tester, not a reason for failure. Some are worth monitoring in case they become more serious.

1 December 2025 (56,581 miles)

- Nearside Rear: Integral body structure deformed but structural rigidity not significantly reduced - outer sill area (6.1.1(a)(i))
- Offside Front: Integral body structure deformed but structural rigidity not significantly reduced - outer sill area (6.1.1(a)(i))

25 November 2024 (46,668 miles)

- Offside Front: Tyre worn close to legal limit/worn on edge (5.2.3(e))
- Nearside Front: Tyre worn close to legal limit/worn on edge (5.2.3(e))

28 January 2021 (22,753 miles)

- Front: Brake pad(s) wearing thin (1.1.13(a)(ii))
- Rear: Brake pad(s) wearing thin (1.1.13(a)(ii))

Note on the most recent test (3 August 2026):

The prior test (1 December 2025) recorded sill-area advisories on both the nearside rear and offside front. These were noted as not significantly reducing structural rigidity at the time. Buyers with any questions about this are welcome to ask us directly - we're happy to talk it through.
